TORCH
VOLUME XXX
STRAFFORD HIGH SCHOOL
EDITOR-GAIL COWAN

Living --
is a growing process, a sprouting of an individual, the walking, breathing, talking, and laughing of daily life.

Living --
is the sense of belonging in a writhing, pushing, shoving mass of little bodies united wholeheartedly in a single purpose.

Living --
is the dizzying sensation of casting everything that ever mattered to the four winds and just being ridiculously silly.

Living --
is applying yourself, really hanging in there and keeping that enthusiastic spark of interest glowing.

Living --
is slowing down just enough to catch your breath and a second of reflection and then starting all over again.

Living --
is when you take one final look, a very deep breath, close your eyes, and remember it all with a smile.

-Julie Cates-

They received one superior ribbon, two excellent ribbons and one outstanding. Unfortunately, one of the girls got sick and had to go home, but the rest kept on cheering.

By the end of their five day stay, even though they had fun, they couldn't wait to get home and get some sleep.

RIGHT: Mrs. Anderson helps Craig Manville and John Davis to better understand their English assignment. Being a sixth grader is a memorable time in a person's life. The changes that occur now are definite steps toward the future. After elementary school, one can never go back to the way it was. The teachers are different, the time schedules are different, and most usually the students are different. They all change in some way. Whatever the change, they will all remember the friends and fun they had in grade school.
